

Chloe Tenenbaum

(703) 946-4593 | Arlington, VA | chloe.tenenbaum@gmail.com | linkedin.com/in/chloe-tenenbaum

Skills

Lab: Gene Analytics (Geneious, PROVEAN, Swiss Model, Phosphorylation Site Prediction Model) (5 years, *intermediate*), qPCR (4 years, *advanced*), Cell Engineering (4 years, *advanced*), Immunofluorescence Imaging (2 years, *intermediate*).

Programming: MATLAB Image Processing (3 years, *advanced*), RStudio (2 years, *intermediate*), Python (2 years, *beginner*), SQL Server (1 year, *intermediate*), DAX (1 year, *intermediate*).

Platforms: Power BI (Certified, 2 years, *intermediate*), Salesforce CRM Analytics (Certified, 1 year, *intermediate*), Jira (6 months, *intermediate*).

Professional Experience

Data Analytics Practitioner

Accenture Federal Services, Arlington, VA (Jul 2023 – Present)

- Oversaw maintenance of 30 SQL Servers; conducted regular smoke tests to ensure availability for contractors and senior leadership.
- Effectively managed and resolved 100+ IT service requests using Jira to ensure the timely and efficient resolution of tickets
- Worked closely with product owners, data engineers, and testers to ensure the smooth deployment of reports
- Developed a Power BI Spending Plan Dashboard, providing DOE senior leadership with access to budget insights.

Biomedical Engineering TA/Consultant

Virginia Tech Department of Biomedical Engineering, Blacksburg, VA (Jan 2023– Sep 2023)

- Co-led a clinical immersion course with Industrial Design and Biomedical Engineering students, addressing 15 user needs of rural VA hospital patients that were identified through interviews.
- Develop medical UI solutions, resulting in 2 successful capstone projects aimed at alleviating identified patient pain points.
- Co-authored a paper submitted to the Journal of Biomedical Engineering Education.

Biomedical Engineering Internship

Virginia Commonwealth University, Richmond, VA (Jun 2021- Aug 2021)

- Engineered epithelial cells over 10 times to advance research on epithelial-mesenchymal transition pathways, presented research at the year-end symposium to a senior academic audience.
- Conducted RNA sample analysis to identify gene expression changes and performed cellular imaging for 15 hours using fluorescence microscopy.
- Wrote a program to convert cells images into binary to quantify cells for lab use.

Bioinformatics Research Internship

Virginia Tech Veterinary School of Medicine, Blacksburg, VA (May 2020- Aug 2020)

- Analyzed over 136,000 nucleotides to identify damaging variants in the NF- κ B pathway using mathematical models.
- Created digital 3D models of proteins; presented findings as an NIH-certified NIDDK Research Scholar.

Education

Virginia Tech - B.S. Biomedical Engineering (May 2023)

Projects:

Lymphatic System Mannequin (2023)

- Designed a mannequin replicating lymphatic fluid flow, utilized in manual lymphatic drainage training.

Myo Wristband Controlled Light System (2022) Mannequin (2023)

- Developed an electromyography-based control system to manage Neopixel LED strip color and animation via hand signals.

Related Coursework:

Biomedical Devices, Wearable Bioinstrumentation, Bioinstrumentation Laboratory and Design, Computational Neuroscience and Neural Engineering, BME Cell Engineering, Commercialization of BME Research

Publications

- Educational Outcomes of a Transdisciplinary Clinical Immersion Course on Needs Identification with an Emphasis on Veteran Healthcare (Authored 2024, pending publication)

Certifications

- Salesforce Certified Tableau CRM Analytics and Einstein Discovery Consultant (2024)
- Microsoft Certified: Power BI Data Analyst Associate (2023)
