

Robert S. Warren Jr.

rswarren14@gmail.com

Cell: (410) 980-3910*

Dynamic software engineer who is results driven with experience in a wide variety of software, hardware, and systems. Possesses strong technical skills, including programming and troubleshooting new software and hardware implementations. Experienced in managing complex projects to meet strict deadlines in a fast paced and rapidly changing environment.

EDUCATION

Jacksonville State University

September 2013- May 2016

- Major: *B.S, Computer Information Systems;*
 - *Concentration: Cyber Security and Information Assurance*
- Minor: *Military Science*
- *Army ROTC*

EXPERIENCE

Software Engineer, Lead/Manager

September 2021 – Present

Accenture Federal Services

- Project Technical lead and manager;
- Responsible for all aspects of full software development life cycle and practicing a security first mindset with all developers deploying applications to NIPR, SIPR and Special Access programs (SAP) enclaves;
- Heavily involved in the entire SDLC from “requirements gathering to deployment” while remaining present with code deployments;
- Programming Languages: Java, Javascript/typescript, Python, SQL,
- Used Maven Spring and Spring Boot, Apache Tomcat, NodeJS, AngularJS, ReactJS, Redux and Gradle for build/deploy frameworks;
- Managed team on separate efforts with the organization including Web application development, Pipeline development, QA, security and site reliability engineers, orchestrating resources to boost team productivity while maintaining and enforcing a “secure code” mindset;
- Developed a secure Data transfer capability using Python and JavaScript and successfully deployed it to a production environment in the secure cloud for DoD customers to utilize;
- Developed Front end Features leveraging Angular and NodeJS
- Performed technical interviews of candidate for all positions including software engineers/Developers, SREs, DevOps engineers, systems engineers, and architects.
- Provided technical oversight and guidance in the form of code reviews to Software Developers, SREs and DevOps to standardize documentation, architecture, incident and performance response, ticket management, modular programming practices and automation approaches;
- Deployed Konvoy and VMware TKG Kubernetes distributions for a secure and air-gapped environment;
- Deployed and upgraded PlatformOne Big Bang for an “out of the box” DevSecOps solution;
- Heavily Utilized Scrum methodologies within all teams, coaching and training team members on agile framework;
- Setup and standardized QA development efforts with the teams. Training staff and developed policies and procedures such as master test cases, e2e tests, and unit tests for QA integration to the application development teams;
- Development Terraform provisioned AWS infrastructure with Ansible configured services to support DevSecOps pipeline efforts;
- Manage source code on multiple repositories: branching schemes, reverts, merge/pull requests, conflicts, blame research, commit history and rebasing using Git.
- Admin and scrum master on Jira instances, creating sprints, updating backlog, creating bug tickets, stories and tasks, using both sprint and Kanban;
- Created architecture diagrams for all levels of the SDLC: cloud infrastructure, flow process, software & database architecture;
- Comfortably presented many project demos and brief to stakeholders and commanders – including large audiences, both virtual and in-person;

- Monitor performance on Kubernetes clusters using Grafana and creating scripts to offload Kubernetes infrastructure log to S3 buckets for future Splunk implementation and security incident management;
- Use Shell bash scripting in combination with Ansible to install and configure services for an automated Dev/QA/Release pipeline;
- Collaboratively added SNS notifications to the control plane of the Kubernetes clusters to preemptively gauge the risk of node outages by alerting team members before an outage occurs;
- Monitor AWS instances for CPU spikes using CloudWatch by implementing CloudWatch alerts to alert performance issues of the infrastructure supporting the Kubernetes platform

Battalion Signal Officer

October 2023 – Present

United States Army Reserves

- Battalion Signal Officer of a Civil Affairs Battalion comprised of over 500 personnel;
- Serves as the advisor to the Battalion Commander on all matters concerning tactical communications, information technology and automation information security and assurance, and network management;
- Spearheaded communication strategies ensuring effective command and control during airborne operations;
- Led a team of signal Soldiers in executing communication plans tailored to the unique challenges of airborne and civil affairs missions;
- Coordinates and maintains communications systems for airborne missions, including a thorough understanding of paradrop and air-land operations;
- Ensured communication equipment met stringent airborne standards and facilitated rapid deployment;
- Integrates communication plans seamlessly with civil affairs objectives, supporting civil-military cooperation and information exchange in diverse operational environments;
- Collaborates with civil affairs teams to enhance communication strategies for community engagement and coordination;
- Manages and maintains specialized airborne communication equipment including radios, airborne intercom systems, and cryptographic devices;

Company Commander

August 2021 – October 2023

United States Army Reserves

- Commanded a Brigade Signal Company comprised of over 55 Personnel.
- Oversaw a team of Signal Soldiers in executing communication plans and operations.
- Demonstrated effective leadership in managing personnel, resources, and communication assets of over \$10 Million.
- Developed and implemented comprehensive communication plans supporting brigade-level operations, ensuring seamless connectivity and information flow on Mission Command systems.
- Collaborated with staff officers to integrate communication strategies into overall mission objectives.
- Led the maintenance and operation of diverse range of communication equipment including radios, satellite systems and cryptographic devices.
- Ensured the readiness and functionality of communication assets to meet the brigade's operational requirements
- Conducted regular training exercises for signal Soldiers, enhancing their proficiency in communication protocols and equipment operation.
- Ensured the company's readiness to deploy and operate in various tactical environments

Software Engineer

November 2018 – September 2021

Boeing Intelligence and Analytics

- Programming Primarily in: Java, JavaScript, HTML/CSS, Cypher(Neo4J), XQuery(MarkLogic NoSQL database), Jinja;
- Used Maven Spring and Spring Boot, Apache Tomcat, NodeJS, ReactJS, Redux and Gradle for build/deploy frameworks;
- Amazon Web Services (AWS);
- SaltStack infrastructure deployment/configuration

- Utilized ApachNiFi for data flow management;
- Developed Custom unit tests;
- Analyzing functional requirements and troubleshoot application code issues and other proprietary software, tools, and technologies;
- API documentation using SwaggerDocs;
- Writing technical documentation regularly;
- Team used Agile Scrum development methodology;
- Managing minor and major configuration changes to the application or its underlying system;
- Utilizing Atlassian products such as: Jira, Confluence, and bitbucket;

Awards & Recognition: Boeing Research and Technology Performance and Innovation award, 2019

Information Systems Engineer

September 2020 - August 2021

United States ArmyReserves

Working as the brigade S6 Information Systems Engineer. Managing the information systems and services and implementing cybersecurity measures to protect information on the Department of Defense Information Network (DODIN) in support of mission requirements. Plans, designs, implements and manages the integration of enterprise services such as active directory, database management, configuration management, e-mail, web-based applications, virtualization, deployments and collaborative services into a fully functional information environment. Ensures appropriate cybersecurity controls and measures are in place and are actively maintained. Focused on the protection of information systems and enterprise services through defensive cyberspace operations(DCO) and assisting with the planning and synchronizing of defensive cyberspace operations response actions(DCO-RA).

Executive Officer**November 2018 - September 2020***United States Army Reserves*

Working as the Executive Officer of a Brigade Signal Company that supports the 55th Sustainment Brigade. Responsible for Supply, maintenance, and unit administrative actions for 55 Soldiers comprised of a Joint network Node platoon and a Command Post Node/Retransmission platoon. Duties also include overseeing unit resources including time, equipment, facilities, COMSEC, Physical Security and manpower to accomplish assigned missions. Responsible for the combat readiness of equipment, 16 tactical vehicles, and signaling assemblies which value over **\$10 Million**. Responsible for the health and welfare of the entire company.

Application Software Developer**July 2016 – November 2018***NTT Data, Federal Services Inc.*

Worked as part of an internal research and development team building demo applications which employ Attribute Based Access Control (ABAC) authentication and authorization technologies, coupled with Federated identity management and browser based single sign on (SSO) services.

Responsibilities:

- Programmed the applications in Java, SQL, JavaScript, HTML, ALFA, XACML
- J2EE architectures (JBoss, Apache, Tomcat) and deployment procedures
- Unit testing with JUnit
- Analyze functional requirements and troubleshoot application code issues and other proprietary software, tools, and technologies
- Web applications and relational databases (SQL server, Oracle, Radiant Logic, Axiomatics)
- Developing and testing software utilizing the Spring, model view controller (MVC) Framework
- Write custom automation testing/quality assurance scripts using SmartBear TestComplete and Xray
- Working as part of a fast-paced team to perform object-oriented application development
- Utilizing Atlassian products such as: Jira, Confluence, and bitbucket
- Troubleshoot problems to attempt and determine the cause by interacting with the affected user, accessing system logs, and attempting to replicate the reported problem.
- Managing minor and major configuration changes to the application or its underlying systems
- Updating documentation to more clearly describe how the user should perform a specific application feature
- Delivered high-quality software to executive staff, partners and potential clients
- Wrote technical documentation regularly
- Experienced generating reports using Jaspersoft Studio, Jaspersoft Server, and Tableau Server
- Utilizing PingFederate Server and MAX.gov authentication services for SSO integration
- Serving as Tier 2 in support of the applications
- Agile Scrum and Kanban development methodologies

Contracts: Developed systems on multiple contracts under the Bureau of Alcohol Tobacco Firearms and Explosives (ATFE) and Department of Justice (DOJ) contracts utilizing a COTS platform at its core.

United States Army Reserves

Experienced in planning, installing, integrating, operating and maintaining the Army's voice, data and information systems, services and resources. Forward thinking and have a complete knowledge of various technologies. Lead and trained a 20-person platoon in garrison. Directed tactical employment and maintenance of nine tactical vehicles and nodal assets worth over \$750,000. Evaluated field training environments and intelligence while mitigating risk. Lead first platoon in numerous successfully completed communications exercises supporting higher command echelons. Completed a five-month Signal Basic Officer Leader Course (SBOLC) which focused on basic networking and cyber security methodologies, satellite communications, power distribution, patrolling techniques and advanced leadership topics.

Responsibilities:

- Planning and executing all aspects of communication on missions, both during combat and peacetime;
- Understanding tactical decision making and the Signal Officer's role as a leader in a combined arms or joint force environment;
- Coordinating employment of Signal Soldiers at all levels of command, from platoon to battalion and higher, in U.S. and multinational operations;
- Controlling communications related training, equipment, and maintenance requirements;
- Assisting in the management of a deployable tactical communications network;
- Providing supervision, guidance, training, and professional development to Soldiers;

Network Engineer, Intern**May 2015 - August 2015***Orbis Technologies, Inc.*

Worked on networking equipment such as switches, routers, firewalls (brands include Cisco, Netgear, Juniper, HP, and other vendors). Configured virtual machines (Red-Hat, Linux, Windows), worked on internal network projects.

Responsibilities:

- Performed diagnostics and troubleshoot system issues; maintain equipment inventory lists;
- Disassembled workstations and servers to perform hardware maintenance and upgrades;
- Maintained network users and resources through Active Directory;
- Team collaboration, documentation and ticketing through Confluence and Jira;
- Installed, upgraded, and maintained Virtual Machines (Windows and Linux) through VMware, Citrix XenCenter, Oracle Virtualbox, Remote Desktop, and SSH shells;
- Experienced with installing and configuring Citrix management tools (XenCenter), VMware technologies (vSphere and vCenter);
- Experienced with creating, managing, and troubleshooting virtual machines, virtual networks, security groups, resource pools, and virtual machine templates;
- Perform installation and configuration of single node Hadoop clusters running Apache ZooKeeper, Cloudera (CDH), JDK 7, Accumulo, JBoss, Ozone Widget Framework, and Maven;
- Experienced in managing and configuring backups through Veeam VMware;

Nodal Network Systems Operator-Maintainer (25N10)**February 2012 - June 2016***United States Army Reserves*

Performed network management functions in support of maintaining, troubleshooting and reengineering of nodal assets as needed in support of operational and tactical requirements.

Technical skills: Programming in: Java, JavaScript, HTML5, Python, C, COBOL, SQL, Cypher, ALFA, XACML; Databases: Oracle, Neo4J; Docker Container, for standalone development and testing; Agile/Scrum software development practices, Robot Framework, Joint Testing Framework, Git(gitlab) Version Control, PowerShell, Apache Tomcat, IBM Rational Doors server, Tableau Development (Tableau Server, Desktop)Atlassian Products (Jira, Confluence, Bitbucket), Attribute-Based Access Control policy engineering (Axiomatics), Federated ID Management (RadiantLogic), Test Automation (TestComplete, Selenium,)security tools: NMap, Nessus, Wireshark, Netwitness, Snort, Metasploit, Kali Linux, Network scanning & Penetration tools, SQL Injections, Brute Force

Non-Technical: Understanding of IOT, COMSEC, ethics, public speaking, team leadership& collaboration, excellent client management skills, time management, adaptability, analytical thinker

Organizations:

Computer Science Club (JSU) Student Member, September 2013 –2016

Association for Computing Machinery (ACM) Member, July 2014 –Present

Institute of Electrical and Electronics Engineers (IEEE) Member, July 2014 –Present

First Lieutenant Robert S. Warren Jr.
Signal Corps
Biographical Summary

As of May 2019

Personal Information:

Date & Place of Birth:	07 December 1990; Annapolis, Maryland
Marital Status:	Married
Children:	2
Home of Address:	1649 Eton Way Crofton, MD21114
Source and Date of Commission:	ROTC 01 June 2016
Enlisted Service:	25N10 Joint Network Node Operator (SPC/E-4)
Clearance Level:	TS/SCI
Total Years of Service:	9 Years
Total Deployments:	N/A

Civilian Education:

Jacksonville State University (Computer Information Systems)

Year Completed

2016

Military Education:

Signal Captain Career Course
25A Basic Officer Leaders Course (BOLC)
25N10 Joint Network Node Operator/Maintainer Course
Basic Combat Training (BCT) Fort Benning

Year Completed

Expected 2022

2016

2013

2012

Duty Assignment and Location:

Student / C Co, 556th SIG BN, 15th Signal Regiment Cadet /

403rd TTOE

Student / B Co, 442nd SIG BN, 15th Signal Regiment

Platoon Leader/ 410th BDE SC 55th Sustainment Brigade

Executive Officer/ 410th BDE SC 55th Sustainment Brigade

Information Systems Engineer/55th Sustainment Brigade

Year Completed

2012 - 2013

2013 - 2016

2016 - 2017

2016 - 2018

2018 - 2020

2020 - present

Decorations and Service Medals:

Army Commendation Medal	National Defense Service Medal
Army Achievement Medal	Army Reserve Components
Army Service Ribbon	Achievement w/oak leaf cluster
